Professional Summary

Frontend & Desktop Application Developer with hands-on experience building cross-platform applications using **React.js, Electron.js, .Net Framwork, WPF, C#, and JavaScript**. Developed and maintained multiple software projects including desktop utilities, game management tools, and administrative dashboards. Familiar with **GitHub Actions CI/CD**, local data caching, and modern software development workflows.

Education

B.Sc. in Information Technology, University of Science and Technology | 2025

Projects

Nexus Game Launcher
- Developed a game library manager using Electron.js and Node.js, featuring a static dashboard for centralized library overview.
- Implemented a local caching system to optimize Steam API data retrieval and reduce application loading latency.
- Designed a cinematic UI with background process management and an integrated timer to track individual game play sessions.

CMD Vault (Electron.js)
- Developed a cross-platform command reference tool using Electron.js and Node.js with Arabic and English UI support.
- Implemented an offline-only application using local JavaScript data structures, eliminating the need for internet connectivity or external databases.
- Automated the build process using GitHub Actions to generate cross-platform installers (.exe, .dmg, .AppImage).

Click2Key (C#, WPF, .NET Framework)
- Developed a desktop app for one-click execution of 100+ Windows keyboard shortcuts with a built-in delay timer.
- Migrated the UI from control-heavy WinForms to a single WPF canvas with virtualized rendering, reducing memory and paint overhead.
- Implemented Arabic/English localization, dynamic light/dark themes, and system-tray background operation.

Folder Notifier (C#, WPF, .NET 8)
- Developed a Windows utility that attaches custom notes to directories with automated, access-triggered popups.
- Engineered a background process using Mutex and IPC for single-instance execution, integrating context menus via Inno Setup.
- Implemented a local SQLite database, dynamic themes, and bilingual localization for an offline-first, zero-telemetry experience.

TempCleaner (C#)
- Developed a Windows utility for automated temporary file cleanup and cache management.
- Optimized storage usage through efficient file system I/O operations.
- Reduced disk clutter by automating cleanup of temporary and update cache directories.

Core Competencies

Frontend & UI
- HTML5/CSS3
- JavaScript
- React.js

Tools & Architecture
- Git/GitHub
- GitHub Actions (CI/CD)
- Data Structures & OOP
- Inno Setup

Desktop & Systems
- C#, C++
- Electron.js
- Node.js
- .Net Framwork

Languages
- Arabic Native
- English Intermediate/B1

Additional Experience & Certificates

Intermediate English Diploma B1, (400 Hrs) – Hadramout Languages Institute | Apr 2021

Software Engineering Core Competencies, (4 Hrs) – DevZone & Hadhramout Foundation | Dec 2025

Front End Development, (40 Hrs) – UST Consultation Center | Aug 2022

International Computer Driving License - ICDL, (50 Hrs) – UST Consultation Center | Mar 2021

Modern Human Resources Management, (50 Hrs) – Al-Rayan University | Sep 2021

Logistic Management For Organizations And Companies, (13 Hrs) – Al-Rayan University | Jul 2020

Skills of Writing Official Letters, (6 Hrs) – Al-Rayan University | Sep 2021

Basics of Translation, (20 Hrs) – Al-Rayan University | Aug 2021

Communicative Body Language, (6 Hrs) – UST Consultation Center | Mar 2021
